Despite Corona and the closure of many customer businesses in the restaurant & hotel, community and event catering sectors, FiltaFry Deutschland has developed in recent months from a mobile deep fryer management provider plus additional services to a full-service provider for commercial kitchens.

In order to successfully expand this path, FiltaFry Deutschland is expanding its team and is bringing on board the 39-year-old Florian Wilke from Bielefeld as Assistant Business Development Manager. He will be primarily responsible for franchiser support and sales of the newer services.

From now on, these will include FOG management including grease separation and automatic cleaning of extraction systems with FiltaVent. Wilke will also continue to expand the service areas FiltaShield, FiltaDrain and FiltaSeal.

"As a trained industrial specialist for food, I am looking forward to the new tasks at FiltaFry, which with the scope of its mobile service offer is truly unique on the German market and is also of interest to many industries outside the catering trade," says Wilke.
